SNOW III

THE RIGHT TEMPERATURE FOR THE BEST GAMING EXPERIENCE

ABYSM
GAMING

SNOW III

SNOW Air Cooling range allows gamers to live their experience seamlessly from temperature changes.

Do you imagine those endless gaming sessions without the heat interrupting the most exciting games?

High quality units, with copper heatpipes from 2 up to 5 depending on the model, high resistance, which together with the aluminum foils, guarantee a perfect operation of the computer.

In addition, its design and adjusted dimensions, allow to optimize CPU´s space without giving up to maintain an optimum CPU temperature.

Install it in a simple way to start enjoying without fuss.

Because the truly important is the gaming experience. And with 5 years warranty.
